Introduction

The WiFi Repeater is a combined wired/wireless network connection device designed specifically for small business, office, and home office networking requirements. It allows a wireless network to be expanded using multiple access points without the need for a wired backbone to link them. It also works well with other 11b/g and 11n protocol wireless products.

NOTE: If you need to reset the Wi-Fi Repeater, you need press and hold the reset button inside the tiny hole for 10 seconds.

Package Contents

Before you starting to use this router, please check if there's anything missing in the package, and contact your dealer of purchase to claim for missing items:

- 1 x Wireless-N Repeater
- 1 x RJ-45 Networking Cable
- 1 x Quick Installation Guide

Getting Started

Setting up a Wireless Infrastructure Network

For a typical wireless setup at home (as shown below), please do the following:

Wireless Repeater Mode

You will need WiFi Router/Router Internet access

Wireless AP Mode

You will need broadband Router/Internet access

Connect the WiFi-Repeater to your Router/Switch with RJ-45 Cable

How to configure the Wi-Fi Repeater

You can configure the Wi-Fi Repeater by connecting it with your computer/laptop with enclosed RJ45 cable or wirelessly.

A. Configure the Wi-Fi Repeater wirelessly.

A1. Plug the Wi-Fi Repeater to a wall socket.

A2. Click on the network icon () or () on the right bottom of your desktop. You will find the signal from the **Wi-Fi Repeater**. Click on "Connect" and wait for a few seconds.

A3. Open web browser and type <http://192.168.10.1> in the browser's address box. This number is the default IP address for this device.

Note: Please check whether the WiFi-Repeater accord with factory default settings once you can't download <http://192.168.10.1>. If you are still not sure what reasons, you can reset the WiFi-Repeater, just need to press the reset button for 10 seconds, then try again.
